

REPORT CHEAT SHEET Growth Monitoring Results (Student)

See how much growth a student is projected to make by the end of the year and the likelihood they will meet their Typical Growth, Stretch Growth, and On-Grade Level measures.

- Use for:**
- Monitoring student progress toward growth measures between Diagnostics
 - Prioritizing which students may need additional intervention and support

When:
After a student completes a Growth Monitoring assessment

Diagnostic Growth (Student): for an individual student's actual growth

- Navigation:** Use this dropdown to quickly navigate to another subject.
- End-of-Year Projection:** Visually represents a student's initial Diagnostic score and a personalized projected end-of-year (EOY) score in relation to the student's growth measures
 - The green band** shows the On Grade Level range for this grade and subject.
 - The solid line** shows the student's Typical Growth measure and the **dashed line** shows the student's Stretch Growth measure, which are based on the initial Diagnostic placement.
 - The blue bar** shows the student's scale score for the initial Diagnostic.
 - The white bar** shows the student's EOY score and the **blue arrow with "+X"** reflects the projected number of points the student is expected to grow by the end of the year.
- Likelihood of Meeting Growth Measures:** This chart shows the likelihood of the student meeting their Typical Growth measure, Stretch Growth measure, and reaching Mid On-Grade Level or Above by the end of the year, along with the number of points the student is projected to grow by the end of the year compared to the respective growth measure.
- Supporting Data:** Select the + icon to open this chart that lists all Diagnostic and Growth Monitoring assessments the student has completed year-to-date, with each assessment's **Date**, **Scale Score**, and **Standard Error** of measurement.

Note

Due to the low number of items on Growth Monitoring, high variation in scale scores from one Growth Monitoring assessment to the next is expected. Solely using individual Growth Monitoring scores to project growth has proven to be an ineffective and biased estimate of student growth. The projected EOY score provides a less biased and more accurate student growth estimate.

2 End-of-Year Projection

2E

	Likelihood of Meeting 100% Growth by EOY	Projected Growth/ Growth Measure
Typical Growth	Somewhat Unlikely < 50% Probable	+15/18
Stretch Growth	Somewhat Unlikely < 50% Probable	+15/31
Mid On-Grade or Above	Somewhat Unlikely < 50% Probable	+15/35

3 Supporting Data

Test Date	Test Type	Score	Standard Error
09/14/18	D	463	+/- 12
10/12/18	GM	465	+/- 18
11/05/18	GM	467	+/- 18

[Understanding Growth Monitoring](#)

Understanding Growth in i-Ready:

Typical Growth and Stretch Growth measures are provided for each student based on their placement on the first Diagnostic assessment of the year.

Typical Growth is the average annual growth for students at this grade and placement level.

Stretch Growth for below-grade level students is an ambitious but attainable level of annual growth that puts below-grade level students on a path toward proficiency. Stretch Growth for on- or above-grade level students is an ambitious but attainable level of annual growth that puts on-grade level students on a path to achieve/maintain advanced proficiency levels.
